OFFERING OVERVIEW

The Kognitiv AI Bootcamp

Turn AI ambition into an approved, secure, and funded Workday use case in six weeks.

Your Workday data could do more. So why hasn't AI moved forward?

Workday holds your most valuable people and finance data, and your most sensitive. Each stakeholder needs something different. **Without a clear path that satisfies everyone, good ideas stall.**

Leadership
Wants proof of return

Security
Wants to know where the data goes

Legal
Wants to manage risk

Workday Team
Wants to know the tenant is ready

Six weeks. One clear path.

What you walk away with

- **A prioritized use case** chosen by your own stakeholders, plus a roadmap of what comes next
- **A business case in your numbers,** with scenarios, payback period, and success metrics
- **A security blueprint** shaped and endorsed by your IT Security team
- **A governance review** completed with Legal and Privacy
- **An executive decision pack and pilot plan,** ready for approval

Secure by design

- **AI never sees more than the user could;** your Workday security model stays in control
- **Only the data needed,** with the most sensitive fields excluded
- **Read before write:** first use cases retrieve, never change, data
- **Every request logged** and visible to your security team
- **People make the decisions;** AI informs and assists

Why Kognitiv

We know Workday from the inside: security groups, business processes, integrations, and the data model. We pair that depth with secure AI design and disciplined business case development, then help you build what leadership approves.
