

ASK, DON'T HUNT

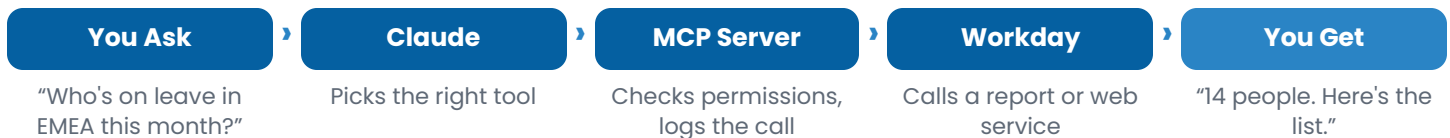

Unlocking Workday Data with MCPs

Less Searching. Faster Answers. Secure Access.

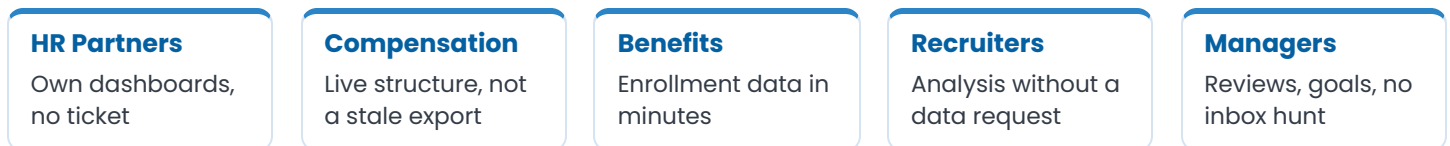

Your people shouldn't have to hunt for Workday data. At Workday Rising US 2026, Kognitiv and Amplitude presented on how teams can **ask Claude**, Anthropic's AI assistant, to get **live Workday data**, scoped to what each person can see.

HOW IT WORKS

MCP (Model Context Protocol) = the secure connector between Claude and Workday

WHO'S USING IT TODAY

LIVE IN PRODUCTION

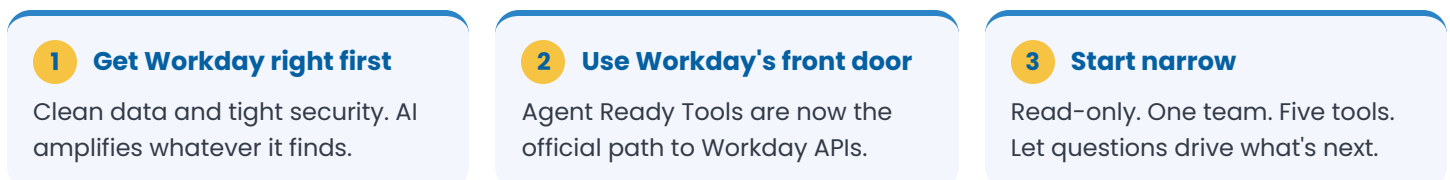

The Path to Approval

- Legal**
Confirmed the AI agreement covered the data.
- Leadership**
A 90-second demo, framed as time back.
- Security**
Workday's own security groups.

How the Data Stays Secure

- ✓ **Runs as you**
Every call carries the user's own identity.
- ✓ **Two servers, two risk profiles**
Comp data stays on a restricted server.
- ✓ **Fully auditable**
Every call logged. Every write confirmed.

THREE THINGS WE'D TELL YOU FIRST

Ready to start? We can help you scope your first MCP.
