

ADAPTIVE PLANNING

Activate Data Driven Decisions

Say goodbye to guesswork and hello to results with Kognitiv's Adaptive Planning service. Achieve real business outcomes with actionable insights through a centralized, flexible tool.

Adaptive Planning puts actionable insights at your fingertips, allowing you to integrate and organize your data systems into a centralized, flexible tool.

From budget analysis to employee experience, Adaptive Planning allows you to metricize key attributes of your business to make data-driven decisions, and measure your journey to achieving real business outcomes with full collaboration from all members of your organization.

Empowering Your Teams to Achieve Tangible Outcomes

Innovation is a team effort, and full adoption of any new system can only be achieved when that system is configured in a way that works for you and your employees. Selecting an experienced, customer-centric partner could be the difference between another half-baked FP&A initiative and successfully ditching spreadsheets for good.

Our team of Workday and Finance business experts understand the complexity of proper financial reporting and analysis. We help you unlock the full potential of Adaptive Planning by tailoring the system to your unique needs and guiding you in adopting advanced features like Predictive Forecasting and Anomaly Detection—so you can plan faster, smarter, and with greater impact.

Adaptive Planning Capabilities

AI-Powered Forecasting & Anomaly Detection in Workday Adaptive Planning

To grow with confidence in today's fast-changing market, organizations need a financial planning solution that is both powerful and intuitive. Workday Adaptive Planning empowers your business with AI-driven insights and seamless integration across your systems, enabling smarter, faster decisions. Our unique approach emphasizes delivering real value to fuel your organizations' growth ambitions.

Predictive Forecasting: Smarter Forecasts, Less Effort

- Generate machine learning-powered forecasts directly within Adaptive Planning. Predictive Forecasting automates forecast creation based on historical trends and high-dimensional data.
- With Predictive Forecasting, you can make more informed decisions and gain higher visibility into potential future outcomes—all within your current Adaptive platform.

Anomaly Detection: Find the Signal in the Noise

- Uncover unexpected trends and outliers in your data with Anomaly Detection. This feature builds a machine learning model from your actuals data and flags variances in your plan versions.
- Leverage Anomaly Detection to proactively catch issues and uncover hidden insights—without needing to dig through rows of numbers manually.

Ready to Achieve Real Business Outcomes?
